

# RSA® ARCHER® GRC PLATFORM

Automate, integrate, manage and report across your enterprise

## AT-A-GLANCE

- Manage policies, controls, risks, assessments and deficiencies through one central platform.
- Automate business processes, streamline workflow and deliver real-time reports across your enterprise.
- Put control into the hands of your business people, enabling them to tailor RSA Archer GRC Solutions and build new applications without development resources.
- Integrate with external systems to support data analysis, process management and reporting.
- Select an on-premise or hosted (SaaS) deployment, according to your needs.
- Download pre-built applications and integrations from the Archer Exchange.

[DATA SHEET](#)

## OVERVIEW

The RSA® Archer® GRC Platform supports business-level management of enterprise governance, risk and compliance. As the foundation for all RSA Archer GRC Solutions, the Platform allows you to adapt the solutions to your requirements, build new applications and integrate with external systems without touching a single line of code. RSA Archer's flexible strategy has won over some of the most demanding Fortune 500 companies. These businesses have seized the power of the Platform to make RSA Archer Solutions their own, modeling additional business processes in a fraction of the time it would take to develop traditional custom applications.

## KEY BENEFITS

The RSA Archer GRC Platform is:

- **Flexible.** The Platform offers a point-and-click interface for building and managing business applications. Non-technical users can automate processes, streamline workflow, control user access, tailor the user interface and report in real-time.
- **Unified.** RSA provides a common platform to manage policies, controls, risks, assessments and deficiencies across lines of business. This unified approach eases system complexity, strengthens user adoption and reduces training time.
- **Collaborative.** The Platform enables cross-functional collaboration and alignment. Business users across IT, finance, operations and legal domains can work together in an integrated framework using common processes and data.

## PLATFORM COMPONENTS

### Application Builder

Tailor RSA Archer GRC Solutions to your unique methodologies, and build on-demand applications through point-and-click configuration.

### Reports and Dashboards

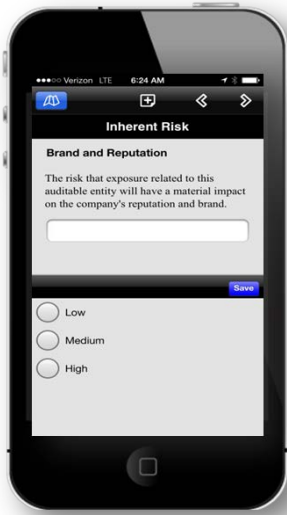

Take advantage of RSA Archer's pre-built reports and dashboards, and create your own with the user-friendly web interface.

### Business Workflow

Define and automate business processes for streamlining the management of content, tasks, statuses and approvals.

### Access Control

Enforce access controls at the system, application, record and field levels so users interact only with the information that is relevant for their roles.

### RSA Archer GRC Mobile

A feature of the RSA Archer GRC Platform, this app enables anytime, anywhere assessments from your iOS mobile device.

## CONTACT US

To learn more about how EMC products, services, and solutions can help solve your business and IT challenges, [contact](#) your local representative or authorized reseller—or visit us at [www.EMC.com/rsa](http://www.EMC.com/rsa).

### User Experience

Brand the RSA Archer GRC Platform with your corporate colors, graphics and naming conventions to maximize end-user adoption and facilitate self-training.

### System Integration

The vendor-neutral RSA Archer GRC Platform serves as a point of consolidation for governance, risk and compliance information of any type. The Platform allows seamless integration of data systems without the need for additional software. You can automate the movement of data into and out of the Platform to support data analysis, process management and reporting.

### Mobile Capabilities

Conduct audit, risk and compliance assessments anywhere from your iOS mobile device.

### Globalization

RSA Archer continues to enhance the Platform for use in markets around the globe, including double-byte support. Localization provides region or language locale-specific components, and multilingual developments enable customers to support multiple languages within their RSA Archer environment.

### Deployment Flexibility

RSA supports both on-premise and hosted (SaaS) deployments of the RSA Archer GRC Platform, allowing you to balance administrative control, time to value and cost considerations when planning your implementation. You have the freedom to deploy the Platform in the most appropriate environment based on your current needs and to move applications from one environment to another as your needs change.

### RSA Archer Exchange

Visit the RSA Archer Exchange to take advantage of pre-built applications and integrations for the RSA Archer GRC Platform. All Exchange applications undergo stringent certification testing to ensure that they provide the quality, performance and ease of use that you require.
